PROPHYLAXYS FOR HEARTWORM (FILARIASIS)

ONCE A YEAR IN MARCH/APRIL IT IS IMPORTANT TO PERFORM A QUICK TEST FOR THE DETECTION OF THIS DISEASE. PROFILASSIS CONSISTS OF GIVING A TABLET ONCE A MONTH AND A MONTHLY SPOT-ON TREATMENT AGAINST PARASITES

EXTERNAL PARASITES: FLEAS, TICKS AND MITES

EXTERNAL PARASITES ARE A VEHICLE FOR MANY DISEASES WHICH CAN AFFECT THE WHOLE FAMILY (SKIN AND BLOOD DISEASES) AND YOUR CAT. A MONTHLY TREATMENT ALL YEAR ROUND IS RECOMMENDED OR THE USE OF ORAL PRODUCTS

INTERNAL PARASITES CAN CAUSE DISEASE FOR YOUR CAT AND FOR THE WHOLE FAMILY AS THEY CAN CAUSE GASTROENTERIC SYMPTOMS. A FAECAL EXAM IS RECOMMENDED AT LEAST ONCE A YEAR AND PREVENTIVE TREATMENTS EVERY 6 MONTHS.

DENTAL HYGIENE: ALITOSIS PREVENTION

DAILY TOOTH-BRUSHING REMAINS THE BEST PREVENTATIVE METHOD, HOWEVER, TEETH SCALING (DETARTRASIS) SHOULD BE DONE WHENEVER YOUR VETERINARIAN SUGGESTS IT. GENGIVAL AND DENTAL INFECTIONS CAUSED BY TARTAR AND PLAQUE CAN CAUSE SERIOUS CARDIAC, RENAL, ARTICULAR AND PROSTATIC DISEASES.

MICROCHIP & PASSPORT

A MICROCHIP REGISTERED WITH THE NATIONAL DATABASE MEANS SHOULD YOUR CAT BECOME LOST HE CAN BE IDENTIFIED AND RETURNED TO YOU.

FOR A PASSPORT TO BE ISSUED YOU NEED TO GO TO THE ASL OFFICE (WE CAN HELP YOU WITH THE PROCEDURE). WE ARE AUTHORISED TO VACCINATE FOR RABIES, MANDATORY FOR TRAVEL OUTSIDE ITALY AND DR GIRALDI IS AUTHORIZED TO REGISTER THE VACCINE ON YOUR PASSPORT APPLICATION.
